Comprehensive services – close to you!

For you, KSB develops its service network continuously: So, we are there for you in Middle East and Africa, too!

As a global leader in our field, KSB has more to offer than just excellent products: Be it the installation and commissioning of your equipment, its maintenance and repair up to customised service concepts.

KSB Service looks after your pump sets at all points of their life cycle. In fact, our range of services applies not only to your KSB products, but also and just as well to your other pumps, valves, motors and related systems of any make or origin.

Always keeping in mind energy efficiency and a high degree of reliability at the lowest possible costs.

Our applications range from general industry, water supply and waste water disposal to building services and power generation.

Contact us!
