Reliability in even toughest conditions:
Our unique range of marine pumps + valves
The flexible comprehensive range for all marine applications

Engineers, shipyards and ship-owners trust our experience and high product quality. KSB offers best in class solutions for any application at sea. See for yourself: the table on pages 7 and 10 gives an overview of KSB products and the different applications in which they are deployed. KSB pumps and valves, KSB ITUR pumps and pumping equipment, AMRI and SISTO valves and actuators and KSB Seil actuators and automation products complete the KSB marine portfolio. All these products are designed to perfectly fit to any marine application. Different fluids can be handled, including sea water, brine, fresh water, hot water, cooling water, fresh water, process water, all kinds of oil, LNG, LPG, LEG, sewage and waste water, aggressive and non aggressive chemical fluids, sludges and dirty oils. KSB products have proven their performance over decades.

Commitment and Quality Guarantee

KSB products fulfil quality, safety and environment standards and requirements. KSB is certified according to:

ISO 9001:2000
ISO 14001:2004
OHSAS 18001:1999

This certification establishes a KSB continuous commitment with the quality standards. It proves the excellence of our products that made us first choice as official supplier for companies all over the globe. Many companies have joined KSB as an official supplier.

KSB pumps and valves and automation products have been approved by the most famous and recognised certification authorities in the world including DNVGL, NKK, GL, KRS, ABS, LR, RINA, RS, BV, etc. These approvals authorise the use of our products on basically all types of ships and processes like cryogenic applications for LNG and LPG, salt and fresh water, ballast, bilge, sanitary, cargo oil, fuel oil, lubricating oil, compressed air, cement and mud, fire water, inert gas systems and on cargo handling systems of ships classified as ‘product’ and ‘chemical’ carriers.
Thousands of sailing ships are equipped with KSB pumps, valves or remote control systems. No matter the ship type (LNGC, oil tanker or dry cargo) or route of the vessel, KSB is always near. Due to collaborations with the main ship repair yards, and well-situated marine service shops, KSB can provide original spare parts and send qualified service engineers in little to no time.

</tbody>
</table>

Description: Vertical in-line centrifugal pump with closed impeller and mechanical seal. ILNS fitted with an auxiliary vacuum pump, ILNE with ejector. The lock pull-out design allows the impeller to be dismantled without removing the pipes and the motor. ATEX-compliant version available.

Services: Cooling SW & FW, ballast, bilge, fire, general service, tank washing, economizer feed, emergency fire, FW generator ejector, foam, HT and LT cooling FW, inert gas SW, IGS cooling SW, M/E SW & FW cooling, M/E Jacket FW, Scrubber cooling SW, vacuum condensate SW, water spray SW, condensate water, deck seal water, anti-heeling

<td>max. 600</td>
<td>max. 52</td>
<td>max. 10</td>
<td>3600</td>
<td>-10 to +80</td>
</tr>
</tbody>
</table>

Description: Horizontal, self-priming centrifugal pump, open or semi-open impeller, adjusted via wear plate, with mechanical seal, ATEX-compliant version available.

Services: Cooling SW & FW, ballast, bilge, fire, general service, emergency fire, hot water circulation.
### AU Monobloc

**Description:** Horizontal, self-priming centrifugal pump in close-coupled design, semi-open impeller, with mechanical seal, driven by electric motors or internal combustion engines, ATEX-compliant version available.  
**Services:** Cooling SW & FW, ballast, bilge, fire, general service, emergency fire, hot water circulation  
**www.ksb.com/product/au-monobloc**

### EZ B/L

**Description:** Self-priming single-stage liquid ring, horizontal pump in close-coupled (EZ B) or long-coupled (EZ L) design, with mechanical seal.  
**Services:** SW & FW Hydrophore, hot water circulation, air cooler, boiler feed applications  
**www.ksb.com/product/ez-b-l**

### Helical gear pump

**RC / RCV**

**Description:** Helical gear pump, self-priming, with bypass valve, for horizontal installation with baseplate or vertical installation.  
**Services:** Main lub. Oil, HFO/FO/MDO transfer, L.O. transfer, sludge, cargo, stripping  
**www.ksb.com/product/rc**

### Eccentric screw pump

**REK**

**Description:** Rotating eccentric screw pump on a base plate or close coupled, with seal box, elastomer stator and relief valve.  
**Services:** Bilge, sewage, black and grey waters, sludge  
**www.ksb.com/product/rek**

### Three screw pump

**DSK**

**Description:** Twin screw self-priming pump for horizontal or vertical position with built-in relief valve.  
**Services:** Main lub. Oil, HFO/FO/MDO transfer, L.O. transfer, sludge, cargo, stripping  
**www.ksb.com/product/dsk**

### Twin screw pump

**TSK**

**Description:** Three screw self-priming pump with horizontal or vertical position with built-in relief valve.  
**Services:** Main lub. Oil, HFO/FO/MDO transfer, ME & GE FO supply, ME & GE FO circulating, HFO/FO purifier feed, L.O. transfer, sludge  
**www.ksb.com/product/tsk**

### Pressure booster systems

**Hydrophore**

**Description:** Fully automatic pressurized water equipment and system, composed by a pumping set with one or several pumps, valves, collector, electric panel and an accumulation pack with pressure tank. Pump control system for continuous speed adjustment on request.  
**Services:** SW&FW Hydrophore  
**www.ksb.com/product/bk**

<th>H (m) Max. 210</th>
<th>n (rpm) Max. 3500</th>
<th>T (°C) 0 to +140</th>
</tr>
</thead>
</table>

Description: Single-stage axially split volute casing pump for horizontal or vertical installation, with double-entry radial impeller, mating flanges to DIN-EN or ASME.

Services: Cooling SW/FW, Ballast, Fire, Scrubber cooling SW

**RDLO**

<table>
<thead>
<tr>
<th>DN (mm)</th>
<th>Q (m³/h) Max. 10000</th>
<th>H (m) Max. 240</th>
<th>n (rpm) Max. 1000</th>
<th>T (°C) 0 to +140</th>
</tr>
</thead>
</table>

Description: Single-stage axially split volute casing pump for horizontal or vertical installation, with double-entry radial impeller, mating flanges to DIN-EN or ASME.

**MegaCPK**

<table>
<thead>
<tr>
<th>DN (mm)</th>
<th>Q (m³/h) Max. 1400</th>
<th>H (m) Max. 233</th>
<th>n (rpm) Max. 3600</th>
<th>T (°C) 40 to +400</th>
</tr>
</thead>
</table>

Description: Horizontal radially split volute casing pump in back pull-out design, with radial impeller, single-entry, single-stage. To DIN EN ISO 2858 / ISO 5199; also available as a variant with "wet" shaft and conical seal chamber. ATEX-compliant version available.

Services: Cooling SW/FW, Ballast, Tank washing, Emergency Fire, Cargo

### Submersible borehole pumps

**UPA 150C**

<table>
<thead>
<tr>
<th>DN (mm)</th>
<th>Q (m³/h) Max. 100-1250</th>
<th>H (m) Max. 480</th>
<th>n (rpm) Max. 3500</th>
<th>T (°C) 0 to +50</th>
</tr>
</thead>
</table>

Description: Single- or multistage centrifugal pumps in ring-section design, single entry, for vertical and depending on the number of stages, horizontal installation; radial or mixed flow hydraulic systems available with reduced impeller diameters, driven by submersible motors, with lift check valve or connection branch.

Services (marine): Seawater lift, fire water pump, jockey, temporary ballast and emergency drain

**Deep-well turbine pumps**

**BEV**

<table>
<thead>
<tr>
<th>DN (mm)</th>
<th>Q (m³/h) Max. 80-400</th>
<th>H (m) Max. 350</th>
<th>n (rpm) Max. 480</th>
<th>T (°C) -10 to +120</th>
</tr>
</thead>
</table>

Description: Multistage deep-well turbine pump with closed impellers, column section with bearing assembly, shaft sleeve, shaft sealed by gland packing, driven by electric motor or diesel engine. ATEX-compliant version available.

Services: Fire, main lub. Oil, Seawater lift and cargo

### Standardised chemical pumps

**MegaCPK**

<table>
<thead>
<tr>
<th>DN (mm)</th>
<th>Q (m³/h) Max. 1160</th>
<th>H (m) Max. 162</th>
<th>n (rpm) Max. 40</th>
<th>T (°C) -90 to +300</th>
</tr>
</thead>
</table>

Description: Horizontal, seal-less volute casing pump in back pull-out design, with magnetic drive, to DIN EN ISO 2858 / ISO 5199, with radial impeller, single-entry, single-stage. ATEX-compliant version available.

Services (marine): Pumping aggressive, toxic, explosive, soluble, flammable, mutagenous or harmful liquids in the chemical, petrochemical, marine and general industries

### Magnetic coupling pumps

**Magnochem**

<table>
<thead>
<tr>
<th>DN (mm)</th>
<th>Q (m³/h) Max. 25-250</th>
<th>H (m) Max. 1160</th>
<th>n (rpm) Max. 40</th>
<th>T (°C) -90 to +300</th>
</tr>
</thead>
</table>

Description: Horizontal, seal-less volute casing pump in back pull-out design, with magnetic drive, to DIN EN ISO 2858 / ISO 5199, with radial impeller, single-entry, single-stage. ATEX-compliant version available.

Services (marine): Pumping aggressive, toxic, explosive, soluble, flammable, mutagenous or harmful liquids in the chemical, petrochemical, marine and general industries

### Submersible motor pumps

**Amarex KRT**

<table>
<thead>
<tr>
<th>DN (mm)</th>
<th>Q (m³/h) Max. 40-700</th>
<th>H (m) Max. 120</th>
<th>n (rpm) Max. 9000</th>
<th>T (°C) Max. +60</th>
</tr>
</thead>
</table>

Description: Vertical single-stage submersible motor pump in close-coupled design, with various impeller types, for reel installation, stationary or transportable version. ATEX-compliant version available.

Services: Bilge
### Slurry pumps

#### LSA-S
- **DN**: 50-660
- **Q [m³/h]**: max. 14000
- **H [m]**: max. 90
- **p [bar]**: max. 17
- **T [°C]**: max. +120
- **Design**: White iron, high efficiency, low head pump for hydrotreatment of slurries at wide range of particle sizes. Robust, proven reliability, maintenance friendly.
- **Services**: submerged Dredge, Inboard, Deck, Booster, Jet Water

#### LHD
- **DN**: 110-700
- **Q [m³/h]**: max. 21600
- **H [m]**: max. 80
- **p [bar]**: max. 17
- **T [°C]**: max. +120
- **Design**: White iron, high efficiency, low head pump for hydrotreatment of slurries at wide range of particle sizes over short distances. Excellent suction behavior, robust.
- **Services**: Submerged Dredge, Inboard, Deck

#### MHD
- **DN**: 80-600
- **Q [m³/h]**: max. 18200
- **H [m]**: max. 100
- **p [bar]**: max. 17
- **T [°C]**: max. +120
- **Design**: White iron, high efficiency, medium head pump for hydrotreatment of slurries at large particle sizes over long distances. Very good suction behavior, robust.
- **Services**: Submerged Dredge, Inboard, Deck

#### TBC
- **DN**: 25-300
- **Q [m³/h]**: max. 3405
- **H [m]**: max. 50
- **p [bar]**: max. 16
- **T [°C]**: max. +120
- **Design**: White iron, high head pump for hydrotreatment of mildly corrosive slurries at wide range of particle sizes. Maintenance friendly, proven reliability.
- **Services**: Submerged Dredge, Inboard, Deck, Booster, Jet Water

### Butterfly valves

#### TRIODIS
- **PN [bar]**: 20 to 150
- **DN**: 80 to 1500
- **T [°C]**: -196 to +600
- **Class**: 150 to 900
- **PN [bar]**: 20 to 150
- **Class**: 150 to 900
- **Design**: Triple-offset butterfly valve, metal-seated (fire-safe), without gland packing, maintenance-free, with lever or manual gearbox, pneumatic, electric or hydraulic actuator. Body made of steel or stainless steel, full-body (74) with flat or raised faces, body only butt-weld ends (BWSE). Body types 74 and 77 can be used for dead-end service. Connections to EN, ASME or JIS. Connections to ASME: Schedule 10S, 10, STD and XS to MPS for valves with butt weld ends (other connections on request). Fugitive emissions performance tested and certified to EN ISO 15848-1, certified to German [TSV] Technical Guidelines on Air Quality Control. Fire-safe design tested and certified to EN ISO 10497. ATEX compliant in accordance with Directive 2014/34/EU. In compliance with NACE MR0175 / ISO 15156 and NDR 0103. Type Approval Certificate by main Classification Societies available.
- **Services**: Natural gas liquefaction. All liquefied gases. Heat transfer fluids, aggressive fluids, oil, gas, petrochemical industry, tank farms, refineries, moisture and offshore-plants.

#### DANAÏS TBTII
- **PN [bar]**: 10 to 20
- **Class**: 150
- **DN**: 50 to 1200
- **T [°C]**: -250 to +200
- **Design**: Double-offset butterfly valve for cryogenic applications; full-body (74). Flanged body (77) with flat or raised faces, or body with butt weld ends made from stainless steel to ASME Class 150, 300, 600; fire-safe design. Manual gearbox, pneumatic, electric or hydraulic actuator.
- **Services**: Natural gas liquefaction for LNG carriers, FLNG, FSRU

#### DANAÏS 150
- **PN [bar]**: 10 to 25
- **Class**: 150
- **DN**: 50 to 1200
- **T [°C]**: -50 to +200
- **Design**: Double-offset butterfly valve with plastomer seat ring (also in fire-safe design), metal seat ring or elastomer seat ring (FKM [VITON R] or NBR [Nitrile]), with gland packing (maintenance-friendly), with lever or manual gearbox, pneumatic, electric or hydraulic actuator. Body made of nodular cast iron, cast steel, aluminium bronze, stainless or duplex stainless steel (254 SMO), wafer-type body (71) or full-body (74). The 74 body type is suitable for dead-end service and downstream dismantling. EN, ASME, JIS connections. Type Approval Certificate by main Classification Societies available. Services: Scrubbing services, cargo valves (tube exchanger, LPG, chemical products)

#### ISORIA
- **PN [bar]**: 10 to 25
- **Class**: 150
- **DN**: 32 to 1000
- **T [°C]**: -196 to +600
- **Design**: Centre-disc butterfly valve, soft-seated, with lever, manual gearbox, pneumatic, electric or hydraulic actuator. Wafer-type body (11), semi-body (12), full-body (14) or U-section body with flat faces (75). Body types 12 and 14 are suitable for downstream dismantling and dead-end service with counterflange. EN, ASME, JIS connections possible. Type Approval Certificate by main Classification Societies available.
- **Services**: Shut-off and control duties in all industrial and energy sectors.

</tr>
</thead>
<tbody>
<tr>
<td>DN</td>
<td>20-150</td>
</tr>
<tr>
<td>T (°C)</td>
<td>-10 to +350</td>
</tr>
</tbody>
</table>

Description: BOA-H Mat E: Automated globe valve with electric actuation and 3-point actuation, actuating forces from 2,000 N to 14,000 N, stem sealed by maintenance-free PTFE v-rings with spring (up to 230 °C) or graphite gland packing (up to 350 °C). BOA-H Mat P: Automated globe valve with pneumatic actuator in spring-to-open or spring-to-close design on option, actuating forces from 1500 N to 26,000 N, stem sealed by maintenance-free v-packing (up to 230 °C) or graphite gland packing (up to 350 °C). Type Approval Certificate by main Classification Societies available.

Series: M/E Lubrication oil, lubrication oil and fuel transfer, HVAC, fuel feed and circulating, cargo valves – non aggressive chemical fluids.
Control valves to DIN/EN

BOA-CVE/CVP H

Description: Control valves to DIN/EN BOA-CVE/CVP H with linear or equal-percentage control characteristic at KVS values of 2.5 to 630 m³/h and closing pressures of up to 40 bar; all internal parts are easy to replace without special tools, including the reversible seat; reduced noise level by standard two-stage pressure reduction combining a parabolic plug and multi-hole cage, available with electric (BOA-CVE H) or pneumatic (BOA-CVP H) actuator. Type Approval Certificate by main Classification Societies available.

Services: M/E Lubrication oil, lubrication oil and fuel transfer, HVAC, fuel feed and circulating, cargo valves – non aggressive chemical fluids

Globe valve to ANSI/ASME with gland packing

WADA GL 150

Description: Globe valve to ANSI/ASME with flanged, butt weld or socket weld ends, made of cast steel A351 CF3M/CF8/CF8M, bolted bonnet, outside screw and yoke, Stellite hard-faced valve disc and back seat, with graphite or PTFE gland packing, stainless steel/graphite gaskets. Type Approval Certificate by main Classification Societies available.

Services: LNG process / All liquefied gases cargo valves

Gate valves to ANSI/ASME

WADA GT 150

Description: Gate valve to ANSI/ASME with flanged, butt weld or socket weld ends, made of cast steel A351 CF3M/CF8/CF8M, bolted bonnet, outside screw and yoke, flexible wedge, graphite or PTFE gland packing, stainless steel/graphite. Type Approval Certificate by main Classification Society available.

Services: LNG process / All liquefied gases cargo valves

Diaphragm valves to DIN/EN

SISTO-KB

Description: Diaphragm valve to DIN/EN with flanged ends; shut-off and sealing to atmosphere by diaphragm; straight-way pattern, body with or without lining, position indicator with integrated stem protection. DN 125 to DN 200 with threaded bush. All moving parts are separated from the fluid by the diaphragm. Maintenance-free.

Services: Ballast, scrubbing services, FIFI, bilge and general service, tank washing, cargo valves

SISTO-16/20

Description: Diaphragm valve to DIN/EN with flanged ends; shut-off and sealing to atmosphere by completely enclosed spiral-supported diaphragm; body with or without lining, position indicator, integrated stem protection. All moving parts are separated from the fluid by the diaphragm. Maintenance-free.

Services: Ballast, scrubbing services, FIFI, bilge and general service, tank washing, cargo valves

Strainers to DIN/EN

BOA-S

Description: Strainer to DIN/EN with flanged ends, with standard or fine strainer insert, all nominal sizes with drain plug in the cover. Type Approval Certificate by main Classification Societies available.

Services: M/E Lubrication oil, lubrication oil and fuel transfer, HVAC, fuel feed and circulating, cargo valves – non aggressive chemical fluids
### Manual gearbox

**MR**

- **Output torque [Nm]**: 16000
- **T [°C]**: -50 to +80

**SB**

- **Output torque [Nm]**: 71000
- **T [°C]**: upon request

**Description**: Heavy-duty manual actuators for operating quarter-turn valves. MR range manual gearboxes, irreversible worm gear or Yoke patented AMRI kinematics. Manual gearbox MR 400 to 1600 can be fitted with actuators. Options include alternative operating mechanisms, limit switch boxes, lefctemperature versions, etc.

**Services**: Building services, industry and process engineering, water and waste water management, energy, petroleum and natural gas, mining, dredgers and shipbuilding.

### Hydraulic actuators

**HQ**

- **Output torque [Nm]**: 51000
- **T [°C]**: -45 to +100

**Description**: Designed for the operation of any type of 1/4 turn valve, the hydraulic actuator series offers output torque values up to 55,251 Nm (5,634 kgf.m) at max. working pressure 160 bar (16MPa). The range of quarter-turn actuators consist of 9 models in 2 kinematics: - rack and pinion kinematics of actuators: HQ 10, HQ25, HQ 50, HQ 100, HQ 200. - scotch yoke kinematics of actuators: HQ 400, HQ800, HQ1600. Equipped with an interchangeable insert, they can be easily adapted to different valve shaft designs (square, flat, etc...). They can be mounted in any positions, at intervals of 90°. Single acting available for HQS with coil spring pack and HQGS with gas spring.

**Services**: All applications in water, energy and industrial engineering

### Electric actuators

**ACTELEC**

- **Output torque [Nm]**: 1200
- **T [°C]**: -20 to +70

**Description**: Electric actuators by BERNARD CONTROLS for direct mounting on quarter-turn valves (actuator flange to ISO 5211) or linear valves in conjunction with a manual gearbox of the MR type series (actuator flange to ISO 5210). Power supply: single-phase AC, three-phase or direct current. Torque switch, travel stop and limit switch box as standard. For on/off or control duties, integrated local control or remote control.

**Services**: All applications in water, energy and industrial engineering

### Pneumatic actuators

**ACTAIR NG**

- **Output torque [Nm]**: 8000
- **T [°C]**: -50 to +120

**Description**: Designed for the operation of any type of 1/4 turn valve, the pneumatic actuator series offers output torque values up to 55,251 Nm (5,634 kgf.m) at max. working pressure 160 bar (16MPa). The range of quarter-turn actuators consist of 9 models in 2 kinematics: - rack and pinion kinematics of actuators: HQ 10, HQ25, HQ 50, HQ 100, HQ 200. - scotch yoke kinematics of actuators: HQ 400, HQ800, HQ1600. Equipped with a releasable fixture, they can be easily adapted to different valve shaft designs (square, flat, etc...). They can be mounted in any positions, at intervals of 90°. Single acting available for HQS with coil spring pack and HQGS with gas spring.

**Services**: All applications in water, energy and industrial engineering

**Description:** Studying and multi-functional. For open/closed position signalling via mechanical limit switches or proximity sensors. AMTROBOX R (R1187) mounts on MR manual gearboxes, ACTAIR/ACTAIR NG pneumatic actuators, HQ hydraulic actuators and any actuators with VVODVE interface. Services: All applications in water engineering, energy engineering, offshore and heavy industry.

---

**Automation systems**

**VRCS (Valve Remote Control System)**

**Description:** System designed for position indication and electro-hydraulic remote control of hydraulically actuated valves. The principle of the VRCS system is that pressurized oil, generated by the power pack, is used to open or close the valve by means of the solenoid controlled actuators.

**Components:**
- Solenoid Valve Rack is control of direction of oil flow to each actuated valve operated by an electric signal from control console installed in safety area.
- Control console for remote operation of the conventional type by the control console with mimic panel. Hydraulic Power Pack consisting of consists of oil tank, electric motor & hydraulic pump which generates the required system operating pressure.
- Deck Box: The deck box controls the functions of each actuated valve installed in hazardous areas via explosion proof solenide valves. Interace Panel consisting of relays, Power supplier, Converters, Barriers and etc., is required to communicate between valves and computerized control system.
- Services: Valves in pipe line of cargo, ballast, bilge & F.O. system of vessels.
