

Sustainability at KSB

KSB makes its customers' plants safer, more energy-efficient and more cost-effective by providing first-class products and excellent service. With this commitment we seek to achieve sustained profitable growth and successfully shape our future.

Our endeavours are guided by a set of common values and behaviours which characterise both work processes at KSB and our relations with our customers and other partners.

We understand sustainability to mean a focus on environmental, economic and social values. As well as the responsible use of resources and the environment, this also includes our responsibility to our employees and our social commitment.

We are continuously improving our products, processes and services to meet the requirements of sustainable development and set new standards.

As a company we focus on

- Delivering enhanced customer value
- Managing for sustainable profitability
- Managing processes effectively
- Fostering and encouraging innovation and creativity
- Developing our employees' skills
- Following the principles of the International Labour Organisation and the United Nations Global Compact
- Using natural resources and energy economically
- Continuously improving the energy efficiency of our products
- Respecting the rules of free competition

To achieve this, we have a comprehensive sustainability management system in place, develop future-oriented products and implement global management systems in line with international standards such as ISO 9001, ISO 14001, ISO 45001 and ISO 26000.

Our sustainability principles including our quality, environmental protection, occupational health and safety guidelines serve as benchmarks which guide our actions. They apply at all locations and for all companies within the KSB Group.
