

► Our technology. Your success.

Pumps • Valves • Service

Top technology for heating,  
ventilation and air-conditioning from  
the **only full-liner**

## Your future starts here: the next generation of heating, ventilation and air-conditioning

Take off for tomorrow, today: with our full range of pumps and valves as well as automation and drive solutions, all in a new dimension. A perfectly matched range of high-efficiency components and service offerings that covers all requirements – from family home to airport. Meet the next generation of heating, ventilation and air-conditioning products. Only from the full-liner. Only from KSB.

### Pumps

The KSB portfolio offers the right pump – from large to little – for any requirement. Like the world's most efficient pump set with the Etaline in-line pump, the world-beating Etanorm and, for smaller applications, Etaline L. Our circulators Calio and Calio S for heating applications and Calio-Therm NC and Calio-Therm S for drinking water complete our product range.

### + Valves

The long-life butterfly and globe valves contribute to KSB's all-round range of products: There're all highly reliable and set the pace when it comes to shutting off and controlling the most varied fluids.

**See for yourself:**

Watch the wide world of heating, ventilation and air-conditioning and experience, up close, the future with KSB.

**+ Drives & automation equipment**

Perfectly equipped for the future thanks to high-efficiency drives and demand-driven operation: KSB SuPremE®, the most efficient magnet-less pump motor, and the new PumpDrive Eco variable speed system.

KSB SuPremE®-Motor

PumpDrive Eco

**+ Energy efficiency concept FluidFuture®**

The future is all about optimising complete systems: With FluidFuture®, KSB analyses your plant as a whole, identifies potential savings and achieves them sustainably – thanks to high-efficiency products.
