### **KSB revises forecast for order intake**

KSB does no longer maintain its forecast of a significant growth in order intake for the full year 2016. This is attributable to a shortfall in orders, substantially due to a lack of project orders and project orders delayed beyond the end of the year. From today's point of view, order intake will decrease by a low one-digit percentage figure compared to the year 2015.

The forecasts for sales and earnings continue to be valid.
