**Provisions for a former project in the pumps segment in Great Britain put a burden on earnings before interest and taxes (EBIT) amounting to approx. EUR 25 million; as a result, the Group's EBIT for 2018 is expected to be below the previous year's figure.**

The Members of the Executive Board of KSB Management SE, the general partner of KSB SE & Co. KGaA, have established today that provisions to be set aside for a former project in Great Britain – in the amount of EUR 25 million – will put a significant burden on the results of the first half of 2018. The Members of the Executive Board expect the provisions be sufficient to cover any risks arising from this project.

As a result of this special effect, KSB now expects the EBIT for the full year 2018 to be below previous year's figure instead of the increase forecast so far.
